

6 more weeks of winter?

Groundhog's Day is
February 2nd.

According to folklore, if it is cloudy when a groundhog comes out of his burrow, he will not see his shadow and spring will come early.

If it is sunny, the groundhog will see his shadow and retreat back into his burrow and winter will last for six more weeks.

To make your puppet you will need:

This groundhog picture

A popsicle stick

A white foam cup

Color the groundhog picture.

Tape the groundhog onto a popsicle stick.

Have a grown up cut a slit into the bottom of the foam cup.

Slide the popsicle stick into the slit.

Bring your puppet outside on February 2. Do you see his shadow?
